

144 Fiber MTP-LC OM3 1U Multimode Angled Patch Panel

\$799.99

UconX® 1U-144 Fiber MTP/MPO (OM3) multi-mode angled patch panel offers an expandable deployment for implementations in 40G/100G networks. Our panels provide significant protection to the installed patch cords in data centers, telecommunication, LAN networks, FTTH's, etc. Angled fronts allow for unobstructed access to the front LC connections or two neatly organized sections reducing the possibility of accidental configurations. The ultra high density MTP Male 0.35dB IL panel is designed for 10GbE networks and 40/100GbE migration networks, fiber channels and data centers.

*It's important to note UconX® panels are built with pre-installed internal MTP fiber optic breakout cables which are manufactured with genuine Corning® glass and USConec®

connectors.
